

**GP ENERGY
PRODUCTS**
Since 1953

GP Energy Products | 868 Sussex Boulevard | Broomall, PA 19008 | 610.544.3400 | www.gpenergyproducts.com

GP Energy Products is the home of the Delaware Valley's leading system design specialists, repair technicians, and installation experts for advanced commercial and industrial heating processes. We have partnered with innovative equipment, accessory and controls suppliers enabling us to design unique heating system solutions for our customers.

BOILERS & BOILER ROOM EQUIPMENT

Bent & Tangential Watertube Boilers up to 1700 HP;
Steam & Hot Water

Gas, Oil, Biomass and Hybrid Firetube and Watertube
Steam and Hot Water Boilers

Atmospheric, Pressurized & Split Tank Deaerators,
Single Pass Firetube Boilers

High Turndown, Low NOx, Dual Fuel, Burners

High Efficiency Vertical Firetube Condensing Boilers

Full Boiler Plant Control System Designed to Optimize
Process Performance, Minimize Costs, Simplify Installation,
and Ensure Safe Operation.

Positive Pressure Venting for Boiler Exhaust, Generator
Exhaust, and Grease Duct Systems

High Quality Venting Systems for Special Gas Vent
Applications

PREFABRICATED UNDERGROUND PIPING SOLUTIONS

Preinsulated and fabricated above & underground piping for the
following applications:

- LNG (Liquid Natural Gas) & Cryogenic Liquids
- Oil & Fuel
- Steam & Condensate
- Hot Water
- Chilled Water
- Potent & Process Waste

FABPRO

Custom Fabricated Heat & Fluid Transfer Systems,
Packaged Boiler Pump Plants, and Chiller Plants

GP Energy Products—Stacked and Staffed

GP Energy Products offers experts from all sides of the industrial heating and cooling industry. From Industrial and mechanical engineering to equipment diagnostics to the installation of intricate industrial heating and cooling systems, our team is ready to help you.

Call us for:

- Boiler selection, installation & service
- Fluid pumping systems
- Installation of pre-insulated piping systems
- Boiler repair and rentals
- Heat transfer coils, tubes & equipment
- Containment piping
- Boiler venting
- System controls

We Have It All—24/7

Whether it is emergency repair, engineering design data, or product service, we are available with a single contact.

Service & Boiler Repair Manager

Todd Smith – tsmith@gpenergyproducts.com

General Manager

Christopher Pepe – cpepe@gpenergyproducts.com

Field Applications

Tim Torrens – tim.torrens@merionpump.com

Service – Parts & Sales

Frank Stinger – fstinger@gpenergyproducts.com

Sales Engineers

Bill Gormley – bill.gormley@merionpump.com

Gene Grady (Service) – ggrady@gpenergyproducts.com

Lucas Jackovic – ljackovic@gpenergyproducts.com

Tom Maiocco – tmaiocco@hxcoils.com

Hugh Nawn – hnawn@hxcoils.com

Christopher Pepe – cpepe@gpenergyproducts.com

Stanley Stankiewicz – sstankiewicz@gpenergy.com

Todd Smith – tsmith@gpenergyproducts.com

Matthew Vaughan-Newton – matthew.v@merionpump.com

Eli Weikert – eweikert@gpenergyproducts.com

Craig Yung – cyung@merionpump.com

Kevin Collins – kcollins@gpenergyproducts.com

Conversion Tips & Tools

FUEL COST COMPARISON (2021)

Fuel	Btu/Gal		Eff%		Cost		Btu/\$1.00	Cost Comparison
#2 Oil	14,000	x	.83	÷	\$3.00	=	38,700	100% (Base)
#6 Oil	152,000	x	.83	÷	\$1.80	=	70,100	55%
Nat. Gas	100,000/Therm	x	.80	÷	\$0.58	=	137,900	28%
Elect.	3412/KwHr	x	1.0	÷	\$0.14	=	24,400	159%

APPROXIMATE STEAM PRESSURE VS TEMPERATURE VALUES

Steam @	0 PSIG	212°F (100°C)
Steam @	10 PSIG	240°F (116°C)
Steam @	25 PSIG	267°F (131°C)
Steam @	35 PSIG	280°F (138°C)
Steam @	50 PSIG	298°F (148°C)
Steam @	75 PSIG	320°F (160°C)
Steam @	100 PSIG	338°F (170°C)
Steam @	125 PSIG	353°F (178°C)
Steam @	150 PSIG	366°F (186°C)
Steam @	200 PSIG	388°F (198°C)

EQUIVALENCIES

1 Blr HP = 34.4 lbs/steam/hr @ 212°F

1 Blr HP = 33,475 Btu/hr = 9.8 KW

1 KW = 3,412 Btu/hr = 1,000 watts

1 Electric HP = 746 watts

AMPS(3 ph) = $\frac{\text{Watts}}{\text{Volts} \times 1.73}$ AMPS(1 ph) = $\frac{\text{Watts}}{\text{Volts}}$

1 cu. ft. = 1,728 cu. in. = 7.5 gal

1 cu. ft. of water = 62.5 lb. @ 68°F

1 gal. of water = 8.3 lb. @ 68°F = 231 cu. in.

Btu/hr = material wt. (lb./Hr) x Temperature rise (°F) x specific heat

SpecHt Water = 1.0 SpecHt Oil = 0.5
